

PIM-125-C

Industrial Monitor

Chipsee Industrial Monitors are a solid and durable solution for all types of environments. Manufacturing, commercial, or industrial.

PIM-125-C (PN CS-D125) is a 12.5" industrial display that features a **10-point capacitive touchscreen**. The 3mm tempered glass cover with black silk-screen ensures that the screen is water and steam resistant.

The typical power consumption is 14W, while in standby mode CS-D125 uses around 2W, making it ideal for all kinds of applications.
