

## New Industrial PCs with a resistive touch screen

based on the Intel® Celeron® series

## New Industrial PCs with a resistive touch screen – based on the Intel® Celeron® series

We have just added **two new Industrial PCs** to our product line based on the **Intel® Celeron® series**. This time it's two PCs with a resistive touch screen. One with a 10.4" screen, and one with a 12.1" screen. If you've been following the recent releases in this product group, you know that we had more products with a capacitive touch screen, but we are catching up, in order to give you more options, in all screen sizes.

You can take a look at the whole product line below:

- 10.1" PC – the [PPC-J1900-101-C](#)
- 10.4" PC – the [PPC-J1900-104-R](#)
- 12.5" PC – the [PPC-J1900-125-C](#)
- 12.1" PC – the [PPC-J1900-121-R](#)
- 15.6" PC – the [PPC-J1900-156-C](#)
- 17" PC – the [PPC-J1900-170-R](#)
- 19" PC – the [PPC-J1900-190-R](#)
- 21.5" PC – the [PPC-J1900-215-C](#)

## Intel product line features

All the products are high-quality industrial panel computers that feature an LCD with a capacitive/resistive touchscreen, a **quad-core Intel Celeron®**

**series SoC processor with 4GB of DDR3 RAM.**

They feature several expansion connectors on the back side – 3 USB 2.0 connectors, 2 LAN connectors, 2 COM connectors, 3 RS485 connectors, 2 RS232 connectors, and 1 HDMI connector.

Please note that a **WiFi/BLE module** does not come with the product by default, but it can be added.

The product comes with either a preinstalled Linux OS, or you can choose between Windows 7 or Windows 10 OS.

Don't hesitate to [contact us](#) if you have any questions.
