

Two new Industrial Displays

available in the shop - 10.1" and 12.5"

Two new Industrial Displays available in the shop – 10.1" and 12.5"

You'll be glad to know that we have just added two new Industrial Displays to the shop – [PIM-101-C](#) and [PIM-125-C](#). As you can see, you can now purchase two of the smallest available sizes available in our offer: **10.1" and 12.5"**.

Both displays have a 3mm tempered glass cover with black silk-screen that ensures **the screen is water and steam resistant**. Of course, this means that both displays are suitable for harsher industrial environments.

The typical power consumption is 14W, while in standby mode the displays use around 2W.
